Public Safety Service

PAUL E. SMITH
STATE FIRE MARSHAL

July 9, 2007

To: All Life Safety and Property Protection Contractors
From: Boyd Petty, DSFM Manager, Licensing Section

Re: Life Safety and Property Protection Continuing Education Requirements
Licensing Section Memo 2-2007

Per R.S. 40:1664.11, the Life Safety and Property Protection Advisory Board is authorized to establish all initial certification and continuing education requirements for those firms and individuals seeking licensure to perform life safety and property protection contracting in the state. On June 19, 2007, the Life Safety and Property Protection Advisory Board established the following continuing education requirements effective at an individual's renewal in 2008.

Life Safety and Property Protection Continuing Education Requirements

Effective at the time of an individual's renewal in **2008**, each individual license holder must document that he/she has obtained at least **six (6)** contact hours of continuing education. Documentation will be in the form of a statement (provided on the license application) that the individual must sign affirming he/she has met the requirement.

For those individuals who hold a Life Safety endorsement and a Property Protection endorsement, three (3) contact hours must be obtained in each area. For example, an individual who has a fire alarm endorsement (Life Safety) and a security endorsement (Property Protection) on his license must have three hours of continuing education in courses related to fire alarm and three hours in courses related to security.

The employer will also be required to affirm the employee has met the requirements by affirming such on the employee's renewal application (again provided on the application). Continuing education documentation is not required to be submitted with the application but rather kept on file in the employee's personnel file. This documentation will be verified when a facility inspection is done by the fire marshal's office. All documentation dated from January, 2005 to present will be accepted for renewals in 2008.

Those who do not meet this requirement will not be renewed and prevented from working in the industry. Administrative penalties will be pursued against those found falsifying documentation.

Should you have any questions regarding these matters, please contact me at 1-800-256-5452 or 225-925-7047.
